

# Project Euler #4: Largest palindrome product

## Problem Statement

This problem is a programming version of [Problem 4](#) from [projecteuler.net](#)

A palindromic number reads the same both ways. The smallest 6 digit palindrome made from the product of two 3-digit numbers is  $101101 = 143 \times 707$ .

Find the largest palindrome made from the product of two 3-digit numbers which is less than  $N$ .

## Input Format

First line contains  $T$  that denotes the number of test cases. This is followed by  $T$  lines, each containing an integer,  $N$ .

## Output Format

Print the required answer for each test case in a new line.

## Constraints

$1 \leq T < 100$   
 $101101 < N < 1000000$

## Sample Input

```
2
101110
800000
```

## Sample Output

```
101101
793397
```
